# Preference Test#1: Onboarding Screens

## Test Objective:

I decided to carry this preference test to evaluate the validity of an observation during the usability testing. One of the participants clicked the “Start Now” button twice before navigating all the onboarding screens.

The objective of this preference test is to find out the best way to skip the onboarding screens while allowing the users to complete the experience if they choose to.

## Preference Test#1: Onboarding Screens

### Preference test results:

9 out of the 14 participants in the preference test chose the second design over the first one. Two participants mentioned that they like the minimalist design of the second version. One of the participants pointed out that the second version looks cleaner and more focused. Another one mentioned that the button at the bottom is distracting and he felt inclined to click it.

### Changes to the design:

I'll use the second design for the first two onboarding screens. Users will be able to skip the screens by using the "skip" button in the top right corner. I'll add the "Let's Start" button to the third screen as a call to action button.

# Preference Test#2: Appointment rescheduling screen

## Test Objective:

I changed the layout of the “Appointment rescheduling” screen based on the usability testing results. The objective of this preference test is to evaluate which design do users think is easier to use.

The image displays two wireframe designs for an appointment rescheduling screen, side-by-side.

**Left Screen (Original Design):**

- Header: Appointments
- Profile section: Mary (with a small profile icon), Call Mary (with a video camera icon), Chat (with a speech bubble icon).
- Date section: Wed, 17 Feb (with left and right arrows to change date).
- Time buttons: 5:10, 5:30, 7:00.
- Reschedule button (large, rounded rectangle).
- Profile text: I believe everyone is unique, so what works for you may not work.
- Bottom navigation: Home, Assessment, Goals, Health Coach, Me.

**Right Screen (Proposed Design):**

- Header: Reschedule Session
- Header: February 2021
- Calendar grid for February 2021 (Mo-Su):

1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
- Date section: Wednesday, February 17, 2021
- Time slots: 5:10 PM- 4:40 PM, 5:30 PM- 6:00 PM, 7:00 PM- 7:30 PM (each with a radio button).
- Select Appointment Time button (large, rounded rectangle).

## **Preference Test#2: Appintment rescheduling screen**

### **Preference test results:**

12 out of the 14 participants chose the second design over the first one. Four participants mentioned that the second layout is cleaner and allows users to see all the available time slots. Three participants pointed out that the familiar layout makes it easier to use.

### **Changes to the design:**

I'll use the second version. No updates will be done at this point.
